

Instructions:

All computers must be in one network

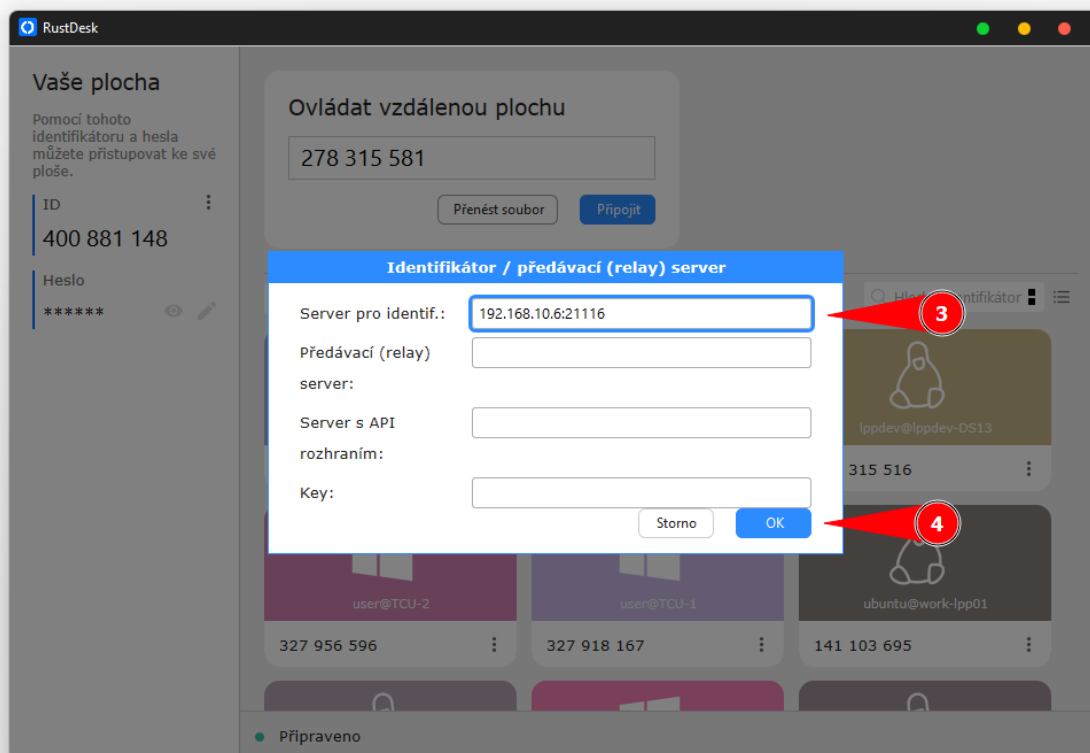

In RustDesk client application, open options (three dots next to your ID)

Open server configuration settings

Type IP Address of computer, where **rustdesk** container is running e.g. `192.168.10.6` and port `21116`. Then confirm it by clicking on **OK** button.

If everything went well, you should see green dot in bottom of application.
